

NEW IN BROKERR

See which agents just went live

The green new count on your Vault now means something powerful. It shows the agents who have just gone live on PropertyFinder or Bayut, brand new to the market, not simply new to your database. When a fresh agent appears you see them straight away, so you can be the first recruiter to reach out while everyone else is still catching up.

Fresh to the market

The new count now tracks agents who went live on a portal in the last 48 hours. These are genuinely new faces, the people worth calling first.

Portal truth, not guesswork

Brokerr reads the real listing dates on PropertyFinder and Bayut and works out the exact day each agent went live, so the count reflects the market rather than our sync.

One click to the new arrivals

Click the green count on the Vault and Brokerr filters straight to the agents who just appeared, sorted with the newest at the top.

Reach them before anyone else

Being first to a brand new agent wins the conversation. Star them, drop them into a pipeline, or message them right away.

HOW IT WORKS

1

Open the **Vault** and find the green **new** count next to the agent total.

2

Click it to see every agent who went live on a portal in the last **48 hours**.

3

Star them, add them to a **pipeline**, or reach out while they are fresh.
