

NEW IN BROKERR

Add your team to event bookings

Recruitment is a team sport. Now, when you schedule an interview, call or meeting in Brokerr, you can bring in the colleagues who need to be there. Add your manager to an interview and everyone is booked and notified automatically. No more chasing people over WhatsApp or forwarding calendar invites by hand.

Add people by name

Start typing a colleague's first name and pick them. No emails, no fuss, and they are added as attendees in a couple of clicks.

Booked into every calendar

Attendees receive a real calendar invite in their Google or Outlook calendar, so it lands where they already work.

Everyone is notified

Each person also gets a notification inside Brokerr and an email, so no one misses an interview or meeting.

See who is attending

Attendee avatars show on the event and across the calendar. Edit any event to add or remove people at any time.

HOW IT WORKS

1

Open a candidate and go to the **Events** tab. Add a title, time and type.

2

Use **Add people** to search teammates by first name and add them.

3

Save. Everyone gets a **calendar invite, notification and email** instantly.
